PIGMENT WAX IN COLORS

RESTORES AND ADDS LIFE AND COLOR TO CEMENT, STONE,
MAGNESITE, SPECIAL COMPOSITION AND PAINTED FLOORS

*Especially recommended for Transmission, Gas, Electric, Power Stations, Showrooms, Corridors,
Packing Plants, Basements, Cafeterias, Schools, Hospitals, Etc.*

PURPOSE:

Pigment Wax eliminates the need for constant repainting and "touching up" worn areas in floors, because it re-applies color every time the floor is waxed. Each coat becomes part of the one beneath, affording high uniform resistance to heavy traffic.

Advantages:

- Insures bright, attractive floors
- Simplifies cleaning by preventing dusting
- Eliminates need for constant scrubbing
- Reduces floor maintenance costs
- Economical

COMPOSITION:

Pigment Wax contains pigments in a blend of vegetable and mineral waxes ground in petroleum solvents. The pigments are the same as those used in high quality paints.

COLORS:

RED

BROWN

GREY

GREEN

BLACK

Since 1938 WINDSOR PIGMENT WAXES have been used to protect and maintain floors in the above colors . . . WINDSOR PIGMENT WAXES retain and enhance the colors Red, Black, Brown, Grey and Green on concrete floors. Lower costs . . . Eliminates repainting . . . Easy to clean

WINDSOR PIGMENT WAXES are available thru your regular source of Sanitary Supplies. Write or telephone for information about your nearest Distributor.

PACKED:

Liquid

5 gal. drum
